DETAILED ACTION

Claim Objections

1. Claims 13 and 20 are objected to because of the following informalities: the claims improperly end with two periods (..) instead of a single period. Appropriate correction is required.

Double Patenting

2. Applicant is advised that should claims 3, and 4 be found allowable, claims 21, and 22 will be objected to under 37 CFR 1.75 as being a substantial duplicate thereof. When two claims in an application are duplicates or else are so close in content that they both cover the same thing, despite a slight difference in wording, it is proper after allowing one claim to object to the other as being a substantial duplicate of the allowed claim. See MPEP § 706.03(k).

3. Claim 23 is objected to under 37 CFR 1.75 as being a substantial duplicate of claim 6. When two claims in an application are duplicates or else are so close in content that they both cover the same thing, despite a slight difference in wording, it is proper after allowing one claim to object to the other as being a substantial duplicate of the allowed claim. See MPEP § 706.03(k).

Claim Rejections - 35 USC § 102

4. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(e) the invention was described in a patent granted on an application for patent by another filed in the United States before the invention thereof by the applicant for patent, or on an international application

by another who has fulfilled the requirements of paragraphs (1), (2), and (4) of section 371(c) of this title before the invention thereof by the applicant for patent.

The changes made to 35 U.S.C. 102(e) by the American Inventors Protection Act of 1999 (AIPA) do not apply to the examination of this application as the application being examined was not (1) filed on or after November 29, 2000, or (2) voluntarily published under 35 U.S.C. 122(b). Therefore, this application is examined under 35 U.S.C. 102(e) prior to the amendment by the AIPA (pre-AIPA 35 U.S.C. 102(e)).

5. Claims 1 - 5, 10 - 15, 19 - 22, and 26 are rejected under 35 U.S.C. 102(e) as being anticipated by Houben et al. Houben et al. teach a system that measures the frequency and duration of beta cell "bursts", either from cells in a patient's pancreas or from transplanted beta cells, and processes the measured data to determine a blood glucose level (see column 3, line 30 - column 4, line 44; column 5, lines 22 - 26 and 42 - 45).

Allowable Subject Matter

6. The following is a statement of reasons for the indication of allowable subject matter: The prior art does not teach or suggest a system that estimates a fundamental frequency of measured detectable signals generated by biological micro-structure activity that includes an autocorrelation operation or using the number of "unvoiced" windows within a predetermined measurement time period.

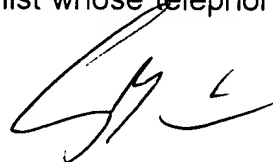

7. Claims 6 - 9, 16 - 18, 24, 25, and 27 are objected to as being dependent upon a rejected base claim, but would be allowable if rewritten in independent form including all of the limitations of the base claim and any intervening claims.
